13) What did you especially like about this course?

Response Text	Frequency	Response Percent
He was a very nice grader and truly tried to get you to understand the content	1	6.25%
I have never had an instructor grade as quickly or have as much availability to assist students outside of class. Will replied via Slack incredibly fast and always addressed concerns/questions in-class, via D2L announcements, and slack. All the materials were super well organized, and the syllabus and class schedule was actually true to the class. Deadlines and expectations were very clear.	1	6.25%
I like the MindTap system, it is very easy to use.	1	6.25%
I liked how there were so many practical aspects to this course. It is definitely something I brag about to recruiters.	1	6.25%
I liked the difficulty of the class. This was the hardest class I have taken, but the most interesting and relevant to the industry in which I want to pursue a career. The professor was also very understanding and flexible and helped us learn the content in the best way possible.	1	6.25%
I really enjoyed how much practice and engagement with the material I was given in the course. I was acclimatized to course content and a lot of the learning.	1	6.25%
I thought that it was a very challenging course that is very applicable to the real world and that was appreaciated.	1	6.25%
interesting subjects	1	6.25%
Learn to use R to make models	1	6.25%
N/A	1	6.25%
the opportunity to learn a hard skill	1	6.25%
The professor had a very helpful nature and kind attitude that helped fost a fantastic learning environment.	1	6.25%
The professor wasn't afraid to dive deeper into the math which was very beneficial	1	6.25%
The slack was a great resource, even if I didn't need to use it much it was great to have it there as a resource & see the questions others had	1	6.25%
The structure of the mindtap assignmnets	1	6.25%
Will Brasic was a good teacher. He was willing to adapt and change parts of the course as it was happening, such as changing the format of the final exam.	1	6.25%
No Response	0	0.00%

14) What suggestions would you make to improve this course?

Response Text	Frequency	Response Percent
At times lectures were a bit hard to follow/understand - I didn't feel that the textbook slides were the best. The oneNote folder helped a lot with this though.	1	6.25%
Don't do mindtap assignments in the same week as tests or written homework assignments.	1	6.25%
I think a different textbook would be beneficial due to the differences in notation and some of the odd choices made by the Wooldridge textbook. Furthermore, I think more question anticipation would be beneficial for getting the class to engage with the course.	1	6.25%
I think the courseware could be more concise.	1	6.25%
I think there can be more teaching and exercise on R code	1	6.25%
I would make it more project with more hands on coding.	1	6.25%
I would say to spread the homework assignments (not the mindtap) because there was a little more than a month between HW1 and HW2 but for HW2 and HW3 there's only one week, and the content is more difficult.	1	6.25%
It was kind of taught as if we already knew everything, which made it hard to start out. it would've been nicer to ease into things.	1	6.25%
More in class examples of what is on the homework	1	6.25%
More in-class R help	1	6.25%
n/a	3	18.75%
na	1	6.25%
No Mindtap	1	6.25%
Perhaps making it a little bit harder. The grade felt that it relied heavily and not always how well you understood the material, which should hold a little bit more value in my opinion.	1	6.25%
No Response	0	0.00%
